Authentication

Portable and
Rugged

An identity in **3 minutes**

Registration, verification and authentication All from the palm of your hand

Chameleon 5R is a multi-modal biometric handheld. It has all the features to register and verify individuals, such as a fingerprint scanner, dual iris scanner, face capture camera and contactless card reader. Automatically authenticate any identity document in the world.

Enhanced forensic Document authentication

Chameleon 5R has enhanced forensic document authentication capabilities. It allows the capture of identity documents with UV, IR, and white light for authenticity checks. Our advanced NFC (Near Field Communication) reads any identity document chip, so you can authenticate individuals instantly.

UV (Ultra Violet) Light

White Light

IR (Infra Red) Light

Designed for on-the-go

Chameleon 5R is rugged, lightweight, and easy to operate. It's designed for on-the-go and can operate without an internet connection. Need more than nine hours of operating time? Quickly swap the battery or charge it with the solar panel.

Accessories

Protective Case

IP67 case including powerbank, photo backdrop, thermal printer and solar panel.

Docking Station
