An identity in **3 minutes**

Go Anywhere. Register Everyone.

Registration, verification and authentication All from the palm of your hand

Chameleon 7 is our most advanced multi-modal biometric handheld. It has all the features to register and verify individuals, such as a 4-4-2 fingerprint scanner, face capture camera, and contactless card reader. Automatically authenticate any identity document in the world.

Enhanced forensic Document authentication

Chameleon 7 has enhanced forensic document authentication capabilities. It allows the capture of identity documents with UV, IR, and white light for authenticity checks. Our advanced NFC (Near Field Communication) reads any identity document chip, so you can authenticate individuals instantly.

UV (Ultra Violet) Light

White Light

IR (Infra Red) Light

Designed for on-the-go

Chameleon 7 is rugged, lightweight, and easy to operate. It's designed for on-the-go and can operate without an internet connection. Need more than nine hours of operating time? Quickly swap the battery or charge it with the solar panel.

Accessories

MRZ Scanner

Integrated high-speed passport scanner. Scans MRZ (Machine Readable Zone) content simultaneously with the RFID chip reader.

Docking Station

Fast-charging docking station, able to charge the device and one battery simultaneously.

Protective Case

IP67 case including powerbank, photo backdrop, thermal printer and solar panel.

Multi-Charger

Fast-charge up to five batteries simultaneously. LCD display indicates the status of each battery.

Utility Holster

Adjustable and rugged nylon carry pouch with a variety of attachment options.

Backpack

Waterproof and lockable backpack with even weight distribution, made from quality, durable nylon.
