Multi-modal
Biometrics

Chameleon 8 is the only advanced, multi-modal biometric tablet in the world that runs on Windows. It has all the features you need to register and verify citizens, such as a 4-4-2 fingerprint scanner, iris camera, face capture camera, and NFC reader. It's rugged and easy to operate. The tablet is highly customisable. From one to four fingerprint capture and an optional passport scanner, many things are possible.

Compliant

Chameleon 8 is compliant with MOSIP for citizen registration. The Modular Open Source Identity Platform (MOSIP) helps governments and other organisations cost-effectively implement a digital, foundational identity system. Being flexible in its architecture, MOSIP allows any nation to freely configure and implement its identity systems.

Accessories

Protective Case
A custom EVA protective case with handstrap, power adaptor and stylus.

Battery Charger
A single battery charger with an LCD indicator for battery status. Lightweight and compact design.

MRZ Scanner
Integrated high-speed passport scanner. Scans eID and RFID content at once.
