Recruitment, job posting, selection

Recruitment prospects and top choice to invite for interviews and easy to use on-boarding process once selected from the pool for the corporation is a core HR commitment. People are the organization's lifeblood and discovering the best fit is crucial. Using Biometriya HRM to manage corporate vacancies, advertise it online via automated webpage/RSS feeds, frees up time and streamlines the process. Biometriya HRM candidate modules direct links to all vacancies and relevant departments in real time.
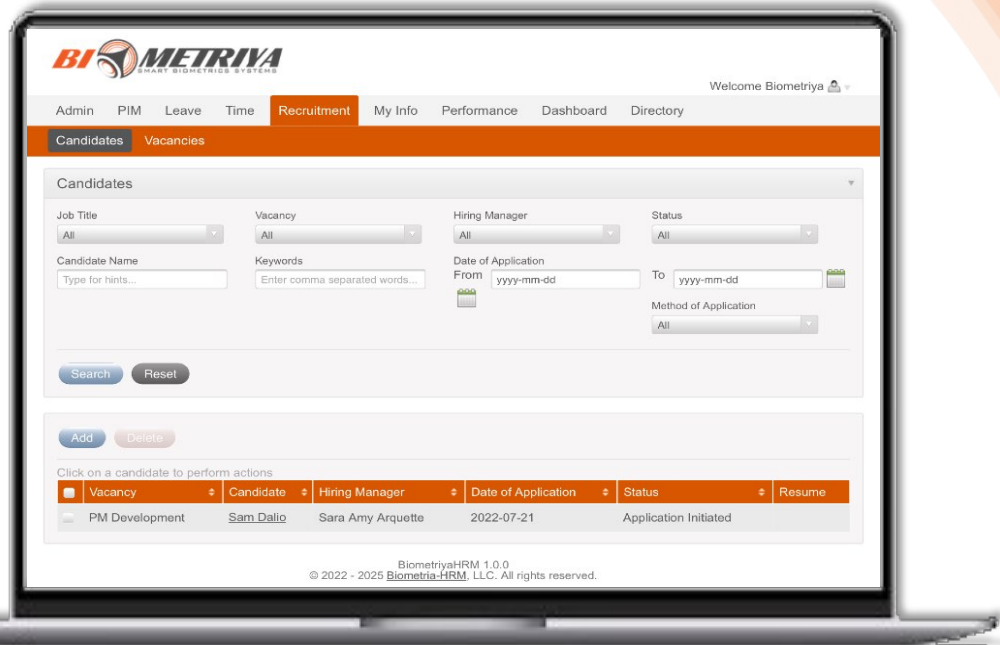

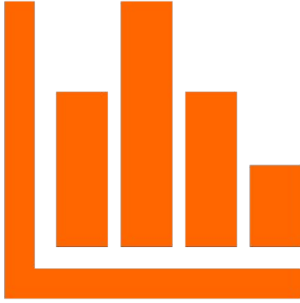

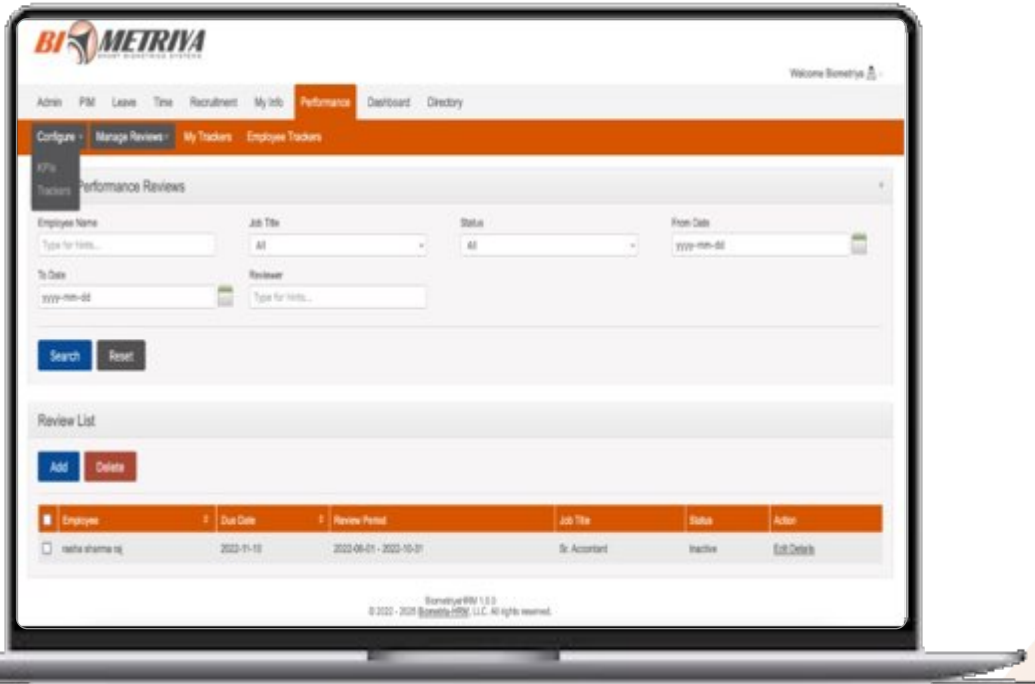

Performance tracker and Management

Superior performance management is vital for the corporate environment. Biometriya HRM performance Management module makes this effortless for all participants. This automated data collection sys tracks employee performance over a wide parameter of customizable metrics. This is not a rigid sys, it is flexible and automated for your specific parameters also featuring automated time, performance and location tracking capabilities.
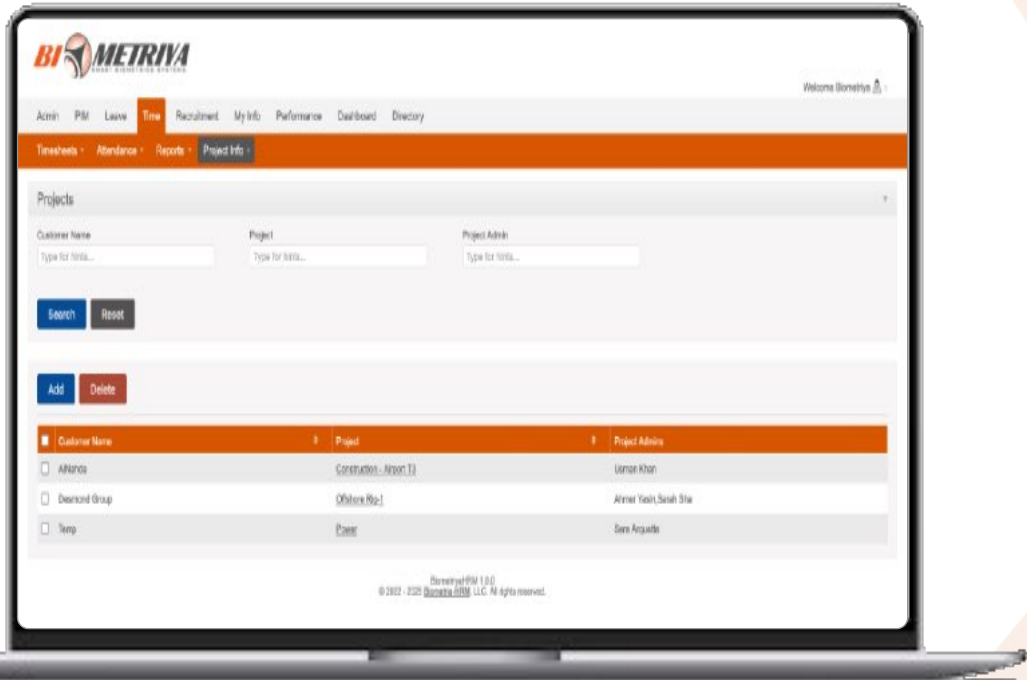

Leave request management system

Biometriya LMS automates the leave request process for a hassle-free experience. Both management and employees will find the process satisfactory as it increases productivity with its features:

- All in one dashboard
- Customizable
- Organization level control
- Easy to use
- Automated notifications

Time & Task management system

Biometriya HRM took it three steps forward from traditional HRMs by applying job and task management features to employees. Simplifying at a glance reporting coupled with the performance tracking feature, you are able to delegate with data-based evidence of what works for great results. Role based access allows managers to easily and frequently assign updated tasks to subordinates, track performance, and quickly check off the corporate to do list!

TIME ATTENDANCE AUTOMATION

Biometriya's HRM is integral to Biometriya ecosystem of leveraging the high throughput FP and mobile BMBT 20 to automate the clock in/out process even without a visible checkpoint. FP, a high throughput, easy to use facial recognition system elevates Biometriya HRM to manage and control employ and visitors access within your facility. Featuring real time location tracking on the cloud or on premises allows you to increase security with a lower variable for human error On the other hand, BMBT 20 facilitates HR team's ability to register new employees remotely, a handy tool in today's age for engaging with a high volume of employees.
