Registration Speed

High-quality
Data capture

The 4-4-2 fingerprint scanner, iris scanner, face capture camera, document scanner and A4 printer ensure a quick and high-quality identity registration.
Laxton

Rapid
Registrations

Quickly process registrations with the large display and full keyboard. The razor-sharp display allows operators to be on top of every step of the registration process in all lighting conditions. The 2nd display allows applicants to follow the process, and confirm information.

### Everything you need
Packed into one rugged case

MOSIP Registration Kit is designed for mobility. The rugged IP67 case protects the equipment during transport, even in harsh conditions. The advanced battery management system ensures full day operations.
